

# GOOD COP BAD COP Hospitality Rider

*Important Information In Preparation For Performance*

## **Parking**

We require ***two parking spaces for duo, four for band.***

We'll gladly use free street parking *if* it's a reasonable distance from where we'll be performing. (Meter parking is *not* a practical option; neither we, nor clients, find it desirable for performance to be interrupted to feed meters.)

If no street parking is available close to where we're performing, you shall provide parking (your property, public garage or lot, valet), ***no cost to Good Cop Bad Cop.***

## **Clear & Easy Path**

Our work requires we bring many pieces of equipment, much of it heavy. ***We very much appreciate having a path to performance area that's reasonably easy to roll and pass through*** (path can be as little a two feet wide). We can handle a curb, even a *few* stairs. However, a flight or more of stairs, high steep hill, rough terrain, even excessive distance is strenuous, time consuming and perhaps even dangerous. A ground floor performance, ramp(s) and/or service elevator are always appreciated. ***If you foresee a difficult load-in/load-out based on conditions set forth here, you must contact us before event day to discuss.***

## **Food**

Nearly all events we play provide food for guests. As we're always on site many hours (load-in, setup, performance, break-down and load-out), we appreciate you feeding us, too (if food is served at your event).

*Thanks for viewing*
